## Changes to your electricity distribution charges

From 1 April 2026, our electricity delivery charges in your region will increase by an average of 9.3%.

As your local lines company, we're here to provide safe and reliable electricity to your door. To do that we continually invest in our network of lines, cables, substations and other assets. This ensures we meet your electricity supply needs now and in the future.

We update our prices on 1 April each year to reflect the cost of operating and investing in the network.

This year's change is a combination of:

	Change		Weighting		Result
Distribution	5.3%	x	75%	=	4.0%
Transmission	21.2%	x	25%	=	5.3%
<b>Total</b>					<b>9.3%</b>

## Average electricity bill

Your distribution prices have two parts;

- Our delivery charges.
- Transpower's transmission charges for using the national grid, which we pass on to you.

Together these charges make up about 37% of your electricity bill.

The other 63% of your bill is made up of generation, retail and other charges. This covers the costs of generating the electricity at the power station, your retailer's costs, GST and levies. This is also where you pay for the electricity that you use, as measured by your power meter reading.

The tables below show how your delivery and transmission prices have changed.

The impact on your electricity bill will depend on how and when you use electricity, and how your retailer chooses to structure how they pass on our charges on to you.

## Powerco electricity information disclosure

### Residential & small commercial customers

Delivery charges	Delivery charges <sup>1</sup> effective 1 April 2026								Estimated number of consumers	Transmission component <sup>2</sup> effective 1 April 2026

1. Delivery Charges include the Transmission charges shown in the "Transmission Component" table.

2. Transmission charges include all recoverable costs such as Transmission costs, council rates and statutory levies.

### Large commercial / industrial

Consumer group	Distribution charges effective 1 April 2026			Transmission charges effective 1 April 2026		Estimated number of consumers	Previous distribution charges			Previous transmission charges	
	Assets and maintenance \$/AMD (kW)	Indirect variable \$/PCD (kW)	Indirect fixed \$/annum	Connection assets \$/AMD (kW)	Other assets \$/ADL (kW)		Assets and maintenance \$/AMD (kW)	Indirect variable \$/PCD (kW)	Indirect fixed \$/annum	Connection assets \$/AMD (kW)	Other assets \$/ADL (kW)
V40 <sup>3</sup> : 300 - 1,499 kVA capacity	239.6	29.8	6,300	29.9	190.8	110	236.3	23.3	4,500	29.4	166.1
V60 <sup>3</sup> : 1,500 kVA capacity and above	103.6	49.5	52,132	25.4	186.6	34	78.9	44.8	14,679	26.4	164.2

3. Charges for the Group V40 and V60 consumers are determined on an individual basis and as such the charges shown here are based on average charge across all consumers in these groups. Group V40 and V60 consumers are charged both Distribution and Transmission charges as detailed above.
