

# Let's talk electricity!

Powerco is here to deliver power to your door safely, reliably and efficiently.

We're investing in the South Waikato community to future-proof your power supply. Our projects include building a new connection to the national grid, upgrading the Putaruru substation and constructing a new cable link between Putaruru and Tirau.

Our national grid connection will benefit about 11,500 properties in Putaruru, Tirau and Matamata currently supplied by a single line from Transpower's Hinuera substation. We are committed to get this done, as we know it will make a real difference for our customers.

This is just some of the work we are delivering to ensure a safer and more reliable network for our customers.

## We want to hear from you

Have a free coffee on us, and lets chat about your electricity needs.
